

Ultralift TP Magnetic Lifter

Designed for Thin Plate Lifting

Datasheet no. 303

Why Thin Plate Magnetic Lifter?

Thin plate cannot accept the magnetism from standard lifting magnets.

Using standard magnetic lifter on thin plate results in:

- Dramatically reduced performance
- Picking up sheets in multiples rather than separately
- Un-safe lifts

Ultralift TP offers:

- A lifting magnet designed for lifting thin plate safely
- SWL based on material thickness
- Guaranteed lifting of single plates
- Simple, quick operation
- Two sizes in the range: TP330 and TP660.
- Larger plates can be lifted using two lifting magnets on a spreader beam

Spreader Beams

Eclipse Magnetics supply a range of spreader beams. These ensure safe lifts are made at all times on longer products.
